

Sunshade Net

Tape shade net, it has the best shading effect, protects plants from excessive sunlight and is durable, generally used for shading in greenhouses

Mono sunshade net is more wind-resistant and can prevent falling objects from causing damage to buildings and plants. It is tear-resistant and durable.

WIDE APPLICATIONS

Anti-Insect Net

The anti-insect net is a physical pest barrier woven from high-density polyethylene (HDPE). Its fine mesh blocks aphids, whiteflies, thrips, diamondback moths and other pests without or with minimal chemical pesticides — a core material for green farming, organic cultivation and IPM programs.

01

PHYSICAL BARRIER

Blocks aphids, whiteflies, thrips & caterpillars physically.

02

LESS PESTICIDE

Grow healthier, safer vegetables with fewer chemicals.

03

UV TREATED HDPE

Long-lasting protection in sun & rain - 3-5 years outdoor life.

04

BREATHABLE

Air & sunlight flow through while pests stay out.

05

MULTIPLE MESH

25-100 mesh for every crop & pest challenge.

06

CUSTOM SIZE

Custom widths & lengths - direct from factory, OEM welcome.

Anti Hail Net

Features:

1. Made from 100% pure HDPE virgin material
2. Resist tearing, fraying, stretching, and sagging.
3. Customizable in various shapes: crescent, diamond, and square.

Weed Mat

Physical weed barrier woven from UV-treated PP — chemical-free weed control for orchards, gardens & nurseries.

70-200gsm

Water & Air Permeable

Factory Direct

OEM/Custom Size

Weed Mat

The weed mat is a physical weed barrier woven from UV-treated polypropylene (PP). Laid flat on the soil surface, it blocks sunlight to suppress weed growth without herbicides, while remaining water- and air-permeable for healthy soil — a core material for modern orchards, vegetable farms, nurseries and green landscaping.

01

Weed Control

Blocks sunlight — suppresses weed growth without chemicals.

02

Permeable

Water & air pass through — healthier soil and roots.

03

UV Treated PP

UV stabilized — 3–5 years outdoor service life.

04

Less Weeding

Dramatically reduces labor cost for weeding & mulching.

05

Pre-Cut Holes

Pre-cut planting holes for orchard trees & crops.

06

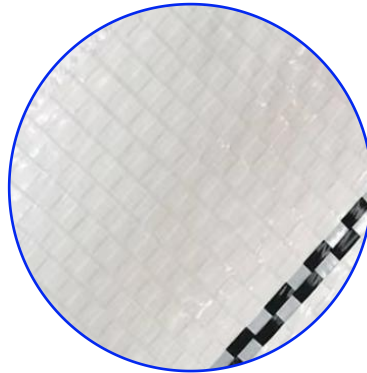

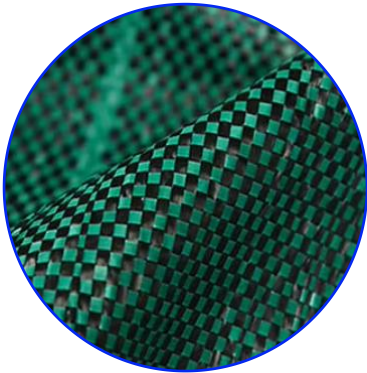

CUSTOM SIZE

Custom widths & lengths - direct from factory, OEM welcome.

Weed Mat

Features:

1. Strong and Durable, anti-corruption, Inhibition of insect pest.
2. Air-ventilation, UV-protection and anti-weather.
3. Does not affect the growth of the crops, Weed-control and keep soil moist, ventilation.
4. Long serving time, which can give 2-5 year guarantee time.
5. Suitable for cultivating all kinds of plant.

Durable pp fabric

It can protect your garden and vegetables from weeds, greatly improving your productivity and efficiency

Weed control & soil improve

This landscape fabric can allow the soil to breathe and keep soil retaining humidity. In addition, the black color has better shading performance, and the material won't cause harm to the earth.

Easy installation

It is convenient to DIY the cloth size and shape to meet your different needs.

Weed Mat

Ground Cover Between Fruit Tree Rows

Covering the rows suppresses weeds, reduces the need for manual weeding and herbicide use, and conserves soil moisture.

Direct Planting with Pre-cut Holes

Varieties with pre-cut holes allow for immediate planting after installation; the uniform plant spacing significantly boosts planting efficiency.

Green Belts and Slope Protection

The heavy-duty version is designed for landscaping projects; it is aesthetically pleasing and durable, helping to reduce maintenance costs.
